

# WORM HUNT SPINNER

Cut out the spinner board and the arrow (or just use an object such as a glue stick to act as the spinner). Take turns spinning to see who many worms each player has to get from the worm bin!

Use pipe cleaners, gummy worms, fake fish bait worms or whatever else “wormy” you have around your house and hide them in the sensory bin. Fill it with whatever sensory material you’d like such as beans, sand, tissue paper or water beads!
