

HOW TO DO THIS ACTIVITY

Thank you for your purchase of this fun nature based Halloween / October activity. Here are the instructions on how to complete it!

What you need

- Clean Bottle - I used a glass one, but water bottles work great too!
- Hot Glue - Bonus points if you have cool color/glitter ones
- Special Ingredients - Glitter, mini bones and anything else you'll want for the potion that won't be found in nature
- Nature Potion Recipe Printable - This is optional, but it's so fun to plan something out and then actually go do it!
- Container for gathering nature ingredients - A small paper bag or bin will work

Directions

1. **Fill out the potion planning sheet + gather** - Don't worry if a kiddo can't think of something for a category. Sometimes it gives them something interesting to look for once they go to gather the other items
2. **Add items into the "potion bottle"** - Water is a great base, but I bet oil would be fun to try too. If you'd like, you can also use some food dye or paint for some color. I used a small amount of glow in the dark green
3. **Seal the top with something special** - You can always use the lid, but encourage kids to find something in nature that's roughly the size of the opening to use instead! Use hot glue to hold the item in place (and make fun drips too!)
4. **Fill out and tape on the label** - Complete the potion by adding a label!

MAGIC POTION RECIPE

Think of a spooky ingredient for each of the categories to make your own "MAGICAL" potion from nature (or what you have available!)

Potion
Name:

What it
Does

Ingredients

For each category, find an ingredient in nature to match it!

Soft

Hard

Rough

Shiny

Orange

Secret Ingredient

POTION LABELS

PRINTER FRIENDLY VERSION

If you are physically crafting a nature potion, use these labels for an extra bit of fun!
